WASTE MANAGEMENT CELL

The waste management cell of Keyway College has been established to ensure that all the waste generated in the college is managed effectively and efficiently. It will be responsible for the collection, storage, and disposal of all the waste materials generated in the college. It will also be responsible for monitoring and controlling the waste generated and for developing strategies to reduce the amount of waste generated. The cell will be headed by the principal of the college who will be supported by a few members of the staff. They will be responsible for establishing and maintaining a proper waste management system and for educating the students about the importance of proper waste management. The cell will also be responsible for coordinating and monitoring the various waste management activities in the college.

AIMS AND OBJECTIVES OF WASTE MANAGEMENT CELL

1. To make people aware of the importance of waste management in the college.
2. To promote sustainable waste management practices by encouraging reuse, reduction and recycling.
3. To create a sustainable waste management system that is cost-effective and efficient.
4. To ensure responsible disposal of hazardous and non-hazardous waste.
5. To help reduce the environmental impacts of waste disposal by encouraging reuse and recycling.
6. To educate the students and staff on the importance of waste management and the need to adopt eco-friendly practices
7. To monitor and evaluate the efficiency of the waste management system in the college.
